MASTERGRAIN FIBERGLASS DOOR FEATURES & BENEFITS

NVD TECHNOLOGY

NVD Technology allows Mastergrain to replicate any natural surface. It makes our products indistinguishable from real wood. Our NVD process begins with selecting the highest quality wood. Next, using a special silicone casting process, we pick up the finest details of the woodgrain. We then move to our NVD chamber where we grow our molds atom-by-atom on top of the silicone. These molds are then used to produce Mastergrain's world class, fiberglass doors and components.

It's What's Inside That Counts!

- Mastergrain's unique NVD Technology replicates the look of real wood in a fiberglass door without the negative aspects of a wood or steel door
- Our doors do not rot or warp like wood doors and requires less maintenance
- Our doors do not rust or dent like steel doors
- Our doors and components are developed from the same molds so that their grain patterns will match evenly with any stain
- Our doors are engineered to withstand the extreme hot and cold temperatures of North America
- Our doors are constructed using rot-resistant composite top and bottom rails.

(KERF NOTCHED BOTTOM RAIL SHOWN)

STRENGTH

We start with oversized 4-1/8" stiles to support our doors. We use 3-1/2" laminated strand lumber (LSL) as part of our door core. LSL is a stable engineered wood product and it prevents our doors from warping.

HIGH DEFINITION

To produce our high-definition woodgrain fiberglass doors, it starts with high-quality fiberglass that is transformed using our NVD Technology. Our standard skin has a minimum thickness of 0.09", and we use a thicker 0.175" skin for engraving or applying stainless-steel inlays.

PERFORMANCE

We insulate our doors with high-density, CFC-free, polyurethane foam. Our polyurethane foam improves energy efficiency and reduces sound transmission.

TABLE OF CONTENTS

- Features & Benefits 2
- Fir 1-Panel Doors 4
- Fir 1-Panel Wide SDL Doors 5
- Fir 3-Panel Craftsman Doors 6
- Flush Cherry Doors 7
- Cherry Stainless Steel Inlay Doors 8
